- Unable to access the dashboard

How to Fix It

- Verify your email address and password.
- Reset your password using the "Forgot Password" option.
- Clear your browser's cache and cookies.
- Try signing in using an incognito/private browsing window.

- Use a supported browser such as the latest version of Chrome, Edge, Firefox, or Safari.
- Disable browser extensions temporarily.
- Ensure your internet connection is stable.

QuickBooks Desktop Login Problem

Desktop users may experience login errors when opening a company file or signing in with an Intuit account.

Signs of the Problem

- Company file won't open
- Login window freezes
- Password rejected
- QuickBooks closes unexpectedly
- License verification issues

How to Fix It

- Restart your computer.
- Update QuickBooks Desktop to the latest release.
- Verify that Caps Lock is not enabled.
- Use the QuickBooks Tool Hub to diagnose startup issues.
- Open a sample company file to determine whether the issue is with your company file.
- Restore a recent backup if the company file is damaged.

Browser-Related Login Issues

Browser settings can sometimes interfere with QuickBooks Online authentication.

Signs

- Endless loading screen
- Session expired repeatedly
- Login redirects continuously

Solutions

- Clear cache and cookies.
- Enable JavaScript.
- Allow cookies for Intuit websites.

- Disable VPN or proxy temporarily.
- Try another supported browser.

Password Reset Tips

If you've forgotten your QuickBooks login credentials:

1. Select **Forgot User ID or Password** on the login page.
2. Verify your identity using your registered email or phone number.
3. Follow the instructions to create a new password.
4. Sign in with your updated credentials.

Tips to Prevent Future Login Problems

- Use a strong, unique password.
- Keep your recovery email and phone number up to date.
- Enable multi-factor authentication where available.
- Install QuickBooks updates regularly.
